## **Amendments to Claims**

aim 26. (currently amended) A process for producing a blend of two or more polyethylenes, comprising the step of contacting:

- (5) (1) ethylene;
- (6) (2) one or more <u>separately added</u> α-olefins of the formula R<sup>18</sup>CH=CH<sub>2</sub>, wherein R<sup>18</sup> is alkyl, wherein R<sup>18</sup> has an even number of carbon atoms;
- (7) (3) a first active polymerization catalyst under conditions to copolymerize ethylene and the <u>separately added</u> α-olefins generated from the active ethylene oligomerization catalyst; and
- (8)(4) a second active polymerization catalyst under conditions to polymerize ethylene, but not readily copolymerize ethylene and  $\alpha$ -olefins.
